SPEAR

SPEAR is a loitering munition that provides a turn-key solution for air-to-ground and ground-to-ground attack operations.

It can be fired from a canister launcher that is ideal for ground forces engaged in tactical missions who need pin-point accuracy against targets. For surgical strikes in terrain that is hard to penetrate for ground personnel, the system is also capable of being air-launched.

MAX SPEED	80 kts
LAUNCH	Canister or Air-Launched
OPERATING ALTITUDE	150 m (AGL)
FIRE CONTROL UNIT	Ruggedized tablet
SENSOR OPTIONS	Fixed or Stabilized EO/IR sensors

The system capabilities presented assume optimal operating conditions. The performance of ground and airborne systems may be affected by various factors, including, but not limited to, radio spectrum conditions, weather, wind, temperature, and style of operation.
